

Maximize the value of surgical video with an enterprise solution to capture, store and share surgical video. Cloud Capture integrates directly with all camera sources to capture every critical moment of a procedure and provide surgeons immediate access to their video.

HOW IT WORKS

Record – Capture real-time surgical video from multiple sources.

Bookmark & Tag – Instantly create snapshots, save key video segments, label critical moments, and add transcriptions.

Upload & Access – Securely store video in the cloud for instant post-procedure review.

Search & Edit – Find, trim, and organize videos effortlessly using metadata and search filters.

Share & Document – Collaborate with peers and streamline medical documentation.

WHY CLOUD CAPTURE

- **Effortless Video Capture & Bookmarking** – Instantly record all video sources and create real-time bookmarks or snapshots.
- **Immediate Post-Procedure Access** – Videos and images are uploaded to the cloud for instant viewing on iPhone, iPad, or desktop.
- **Enhanced Patient & Peer Communication** – Compare pre- and post-procedure images with the Comparator tool.
- **Advanced Search & Metadata Tagging** – Find videos using patient name, procedure timestamps, labels, and transcriptions.
- **Billing & Reimbursement Support** – Bookmark CPT codes and provide video documentation for claims.
- **Multi-Camera Support** – Connect up to 8 video sources for comprehensive procedural capture.

KEY FEATURES

VIDEO EDITING

Quickly modify key in and out points of videos to create smaller segments for distributions.

VOICE CONTROL

Hands-free snapshots & bookmarks using voice commands. Every conversation is automatically transcribed for review.

EASY ACCESS TO VIDEOS

Cloud based storage enables full catalog of videos to be immediately accessible anywhere via an App.

COMPARATOR

Quickly compare two images to see before and after photos.

INSTANT LABELS

Identify key events in video through custom labels that are searchable to quickly recall.

PROCEDURE GALLERY

Review the entire procedure or just key bookmarks and snapshots for any procedure in an intuitive video gallery.

VIEW MULTIPLE VIDEO SOURCES

All video sources within a procedure are viewable any time. Just change the source via a dropdown menu.

ADD NOTES

Add notes to any procedure and quickly search video database for keywords made in the notes section.

SIMPLIFY BILLING

Generate secure URL links for CPT billing codes to streamline claims processing and reduce rejections.

ADVANCED SEARCH

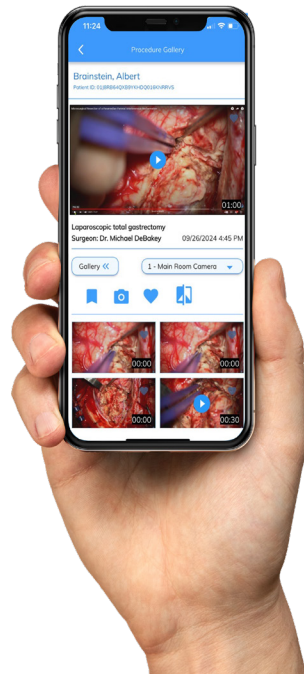

Quickly find any procedure based on surgeon, procedure type, hospital, notes, labels, date, and more.

REVIEW TRANSCRIPTIONS

Search for any keywords and correlate with the precise moment in the procedure

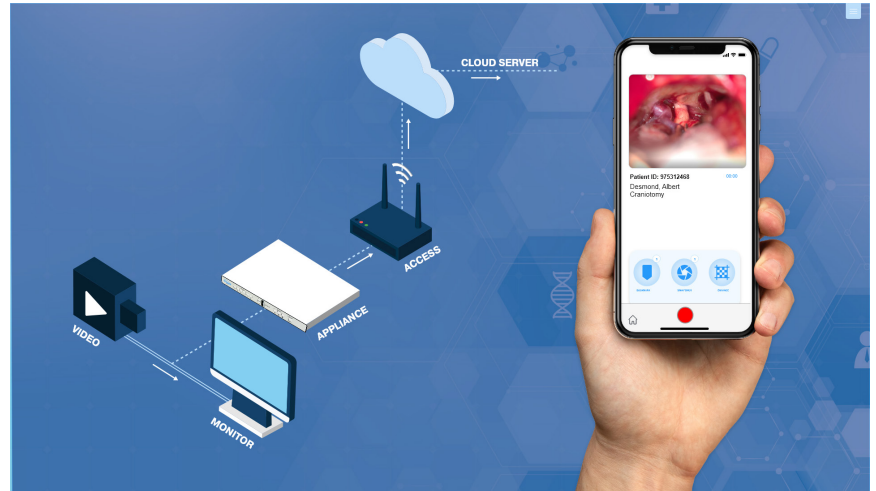

SHARE VIDEOS

Easily share videos with colleagues and peers via a simple button press.

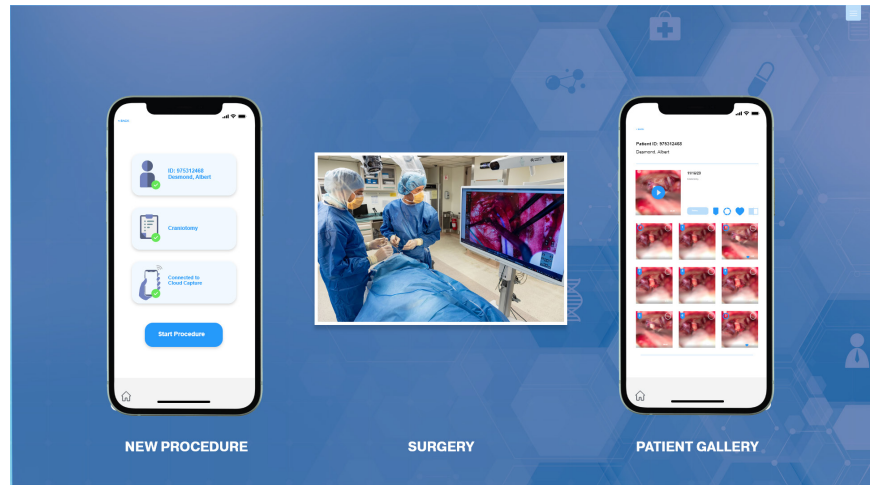

CAPTURE

CloudCapture accesses surgical video by intercepting the video stream inbetween the camera and the monitor. A hardware solution encodes the videos and tags key bookmarks in video stream. The CloudCapture software transmits the video to the CloudCapture Server for video storage, clipping & distribution.

STORE

CloudCapture stores the source video as well as all user defined video clips and snap-shots. Video clips are automatically generated with user-defined bookmarks. All bookmarks and snap-shots are easily viewed and retrieved by a user.

SHARE

CloudCapture provides a simple tool to support the editing and distribution of patient videos. Users can easily edit video clips and send via email to patients or colleagues.
